

# How do YOU use the National Land Cover Dataset?

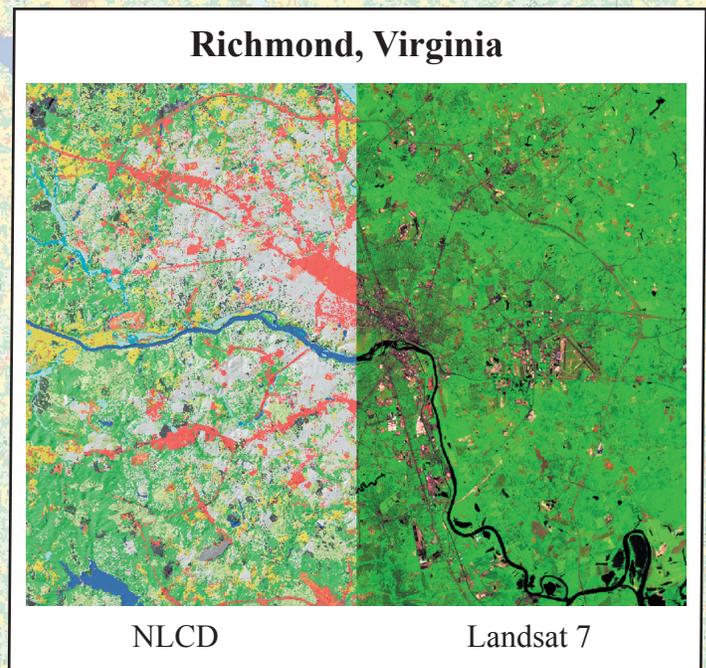

- Land cover change studies • Forest health
- Wildlife habitat studies • Crop protection
- Air quality studies • Urban studies
- Atlas compilation • Climate change studies
- Economic development • 3D perspective rendering
- Water quality studies • Education
- Landscape simulations • Epidemiology
- Pesticide management • Flood hazards
- Siting telecommunication towers
- Carbon flux studies • Soil surveys
- Modeling land-coastal linkages
- Landscape ecology research • Class projects
- Military force protection
- Studying vector borne diseases
- Air Dispersion Modeling • Ecosystem valuations
- Wildfire risk maps • Hurricane hazard studies
- Land cover • Fragmentation • Biodiversity
- Fire fuel maps • Non-point pollution studies
- Evaluating total maximum daily load for rivers and streams
