Mr. Armando Guevara
M7 Visual Intelligence
510 Bering Drive, Suite 310
Houston, TX 77057

Dear Armando:

The U.S. Geological Survey (USGS) digital aerial imagery manufacturer sensor type certification team has completed the review of M7 Visual Intelligence's IRIS One 50 camera system and provides the attached certification document and draft certification report for your system.

The USGS team has prepared a complete documentation record and synopsis of information from the original certification visit and the documentation review for the IRIS One 50. This documentation will be handled and stored as proprietary information, and we will archive the record at the USGS for future reference.

I have provided your team lead, Joe McCoy, with a copy of the draft summary report for the IRIS One 50 for your review. This report is to be released publicly and must not contain proprietary information. Upon completion of your review of this report, the USGS team will incorporate your comments and changes, and release the report. As we previously discussed, the USGS team will handle all certification information as proprietary until it has been approved for release by M7 Visual Intelligence.

This certification is valid for all M7VI IRIS One 50 systems that match the system type(s) evaluated by the USGS. Any major design changes to the standard form, fit, function, or significant differences to the system specifications, effective output, or performance of the system, will require additional evaluation and possible re-certification. Please notify the USGS certification team of any significant system changes. Failure to notify the certification team of system change could result in the loss of type certification.

On behalf of the entire USGS Sensor Type Certification Team, thank you for your time and effort. We look forward to working with M7 Visual Intelligence in the future. If you have any questions, please call me at (605) 594-2569, or email me at stensaas@usgs.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "Gregory L Stensaas". The signature is fluid and cursive, with a long horizontal stroke at the end.
