### **Subject: Successful Completion of the USGS Manufacturer Certification Process for the Applanix Digital Sensor System (DSS)**

The United States Geological Survey (USGS) certifies that the Digital Sensor System (DSS) manufactured by the Applanix Corporation, of Richmond Hills, Ontario, Canada meets the claims of the manufacturer and is capable of providing quality, consistent image data to support civil government mapping and ortho-photography product development.

The USGS provides this certificate to Applanix Corporation for successful completion of the USGS Manufacturer Certification process which included presenting and providing all appropriate information to address the certification requirements as define in the USGS Quality Assurance of Digital Aerial Imagery plan and the USGS Manufacturer Certification Checklist.

This certification is valid for all Applanix DSS camera systems that match the system type evaluated by the USGS during the 2006 site inspection. Any design changes that change the effective output of the system will require additional evaluation and re-certification if necessary.

To discuss manufacturer certification, please contact the manufacturer, or the USGS certification team via the following web mail link - <http://calval.cr.usgs.gov/>.
